

CABLES

Eltra cables are high quality screened cables to provide reliable transmission between the sensor and the subsequent electronics. Thanks to the different cable materials (PVC or PUR, for fixed or flexible installation), to the rugged and compact design they can be used in harsh operating conditions. Eltra provides non-assembled, partially or fully assembled cables as accessories with preferred cable lengths are 1,5 / 2 / 3 / 5 / 10 m. The cables are not appropriate for outside usage (no direct UV and/or moisture exposure), please contact directly our Offices
